Event Registration Description

IBM Bob Partner Lab — Build and Deploy an AI-Powered IT Ticket Classifier

SHORT DESCRIPTION

Hands-On Lab: Build and Deploy a Live AI Application with IBM Bob — 45 Minutes

FULL DESCRIPTION

Go from a GitHub repo to a live, cloud-deployed API in under 45 minutes — using IBM Bob, IBM's AI coding assistant. The application is real: an IT support ticket classifier that determines issue type, assigns priority, routes to the right team, and returns a ticket ID and SLA in under one second. A working proof-of-concept you can take to a client conversation the same day.

Two parallel tracks: one for first-time Bob users, one for those ready to go straight to building and deploying. Both use the same codebase; Track B ends with a live public URL on IBM Cloud.

WHAT'S INCLUDED — BOB COINS LAB CREDIT

250 **Bob Coins — loaded to your account**
Separate from any free trial · Valid for 2 weeks post-event

> The IBM Bob free trial gives you **50 coins**. Lab attendees get **5× that** — 250 coins — valid for **two full weeks after the event**. Build during the lab, then keep experimenting and refine it for a client conversation. No licence or credit card required.

WHAT YOU'LL TAKE AWAY

- **Accelerate your own delivery** — onboard to an unfamiliar codebase and ship something new in a single session
- **Deliver faster for clients** — turn client logic into a deployed, testable API without starting from scratch
- **Show clients what's possible** — leave with a live URL and the story of how you built it in 45 minutes
- **250 Bob Coins to keep** 5× the free trial — 2 weeks to close any post-lab curiosity gaps

AUDIENCE

IBM Partners, developers, technical consultants, and pre-sales architects. No prior Bob experience required. IBM Cloud account provided.

PREREQUISITES

Requirement	Details
IBM Bob access	Active licence or trial — bob.ibm.com/pricing
Laptop	macOS, Windows, or Linux
IBM id	Log in to Bob and accept the IBM Cloud lab invite

You will receive an IBM Cloud invite from no-reply@cloud.ibm.com before the event — accept it in advance.

Duration: 45 minutes · Facilitated · Both tracks run in parallel Questions or licensing: **[CONTACT NAME / EMAIL]** · Pricing: bob.ibm.com/pricing
